
```
git branch Modelos  
git checkout Modelos
```

Creó los modelos...

```
git add .  
git commit -m "Crear Modelos"
```

```
git checkout main  
git merge Modelos
```

```
git branch url_1  
git checkout url_1
```

Creó la URL...

```
git add .  
git commit -m "Crear url_1"
```

```
git checkout main  
git merge url_1
```

```
git branch url_7  
git checkout url_7
```

Creó la URL...

```
git add .  
git commit -m "Crear url_7"  
  
git checkout main  
git merge url_7
```

Cuando tengas internet:

```
git checkout Modelos  
git push --set-upstream origin Modelos
```

```
git checkout url_1  
git push --set-upstream origin url_1
```

...

```
git checkout url_7  
git push --set-upstream origin url_7
```

```
git checkout main  
git push
```

EMERGENCIA:

```
git push --all origin
```
